**Options:**

Product ID. No.	Lamp/ base	Lumen
<b>665-4350</b>	MH35 T6/ G-12 base.	3400

**92311 - External Wire Guard  
92311 - Integral Direct Spread Lens**

Compact accent floodlight with medium beam distribution for Ceramic Metal Halide lamps. These floodlights feature a wide array of optical accessories to realize the most challenging lighting tasks.

**Materials:** Luminaire body and lens frame constructed of one-piece die-cast marine grade aluminum alloy.  
Mounting arm constructed of heavy wall aluminum extrusion.  
Clear, thermal shock tempered glass lens.  
One piece, moulded rubber gasket and internal accessory holder.  
One piece anodized high purity and chemically brightened aluminum reflector.  
PCS coated stainless steel hardware.

**Electrical:** Integral electronic metal halide ballast for **120** or 277 volt -- **Specify Voltage**.  
G-12 base porcelain HID lamp holder supplied with 200 degree high temperature leads.  
(35 watt CDM T-6 lamp by others).

**Mounting:** Designed for mounting over 4" recessed octagon box.  
Contact WE-EF factory for modifications to ballast housing for surface conduit, and feed through wiring.  
Designed and U. L. approved for installation in any directional orientation. Weight: 11.0 lbs.

**Finish:** Standard finish: Black RAL 9004, polyester powder coat with fine texture.  
Optional finishes: White RAL 9016, polyester powder coat with fine texture.  
**Grey Metallic RAL 9007, polyester powder coat with fine texture**

Consult factory for special RAL color options. Specify finish.  
UL, c UL listed for Wet locations.

**Listing:** International Standards: IP66 dust tight/ jet tight.

**Options:** 697-8001: Fusing (120V/ 277V). Specify.  
Refer to optical accessories for internal accessories such as di-chroic color filters, source shield, spread lens or flood lens, and external optical accessories such as glare shields, framing snoots, or wire guards.
